AS714 Bolt: The AS714 Bolt safety sneaker fuses the best in trainer technology with tough protective materials. In a black colourway with cool-grey accents, this sneaker is made with a super lightweight flyknit upper for a cooler wear with stylish synthetic and leather suede overlays adding support and premium style. A low-profile shaped shoe with cushioning padding around the collar and tongue. Toe protected with a 200 Joule impact and compression resistant steel toe cap. Underfoot protection against nails is given with a penetration-resistant composite midsole material that's lightweight and flexible giving full movement. Ergonomically shaped inner removable PU foam foot bed. Ultra-cushioning, lightweight and responsive EVA midsole bringing chunky style to your soles. Slip-resistant SRA-rated hardwearing rubber outsole. Features rear pull-on loop.

- ◆ Flexible Lightweight Rubber Outsole
- ◆ Oil Resistant Outsole
- ◆ Antistatic Construction
- ◆ Energy Absorbent Heel

Care Advice: To enhance the life & performance of the footwear, upper should be kept clean & dry. Dry/damp cloth or shoe polish/spray to be used as per the need. Sole to be checked and clean regularly to maintain its traction. Any obvious damage in footwear may reduce full protection and must be replaced.
